All the vintage charm of racing from the '60s, '70s, '80s,
when every race was yet to be written, nothing was taken
for granted, and drivers battled wheel to wheel until the
last corner.

FOR THE NATURE

The climate change we are experiencing is presenting us with tragic scenarios that we cannot remain indifferent to.

NSR is constantly committed to the protection and respect for the environment. The entire energy needs of the company are managed through photovoltaic panels installed on the roof of the facility, producing 100,000 KW of green energy per year.

The machinery inside the facility is state-of-the-art, with low energy consumption and low environmental impact. Most of the components produced are made from recycled plastic, as well as the paper and cardboard used for packaging. The exhaust gases from production are regularly monitored and released into the environment through careful filtering systems to comply with the latest environmental impact and personnel safety standards. Living on this planet is our right; protecting it is our duty!

NSR is an Italian artisan Company making professional slotcars 100% here in Italy, into its factory. New factory opened in mid 2010.

It displays over 1.100 square meters; it is a building realised with modern techniques in a total respect of health and environment. It is very comfortable, the walls are totally temperature insulated by aluminium padded panels, all the rooms where fellow workers assemble cars and parts, have controlled temperature by automatic power inverters as well as powerfull aspirators for the welding smoke.

There are photovoltaic panels laid on top of the roof to produce over 100.000 KW/year green power energy to totally satisfy our internal power need. Inside the NSR factory work only young people, dynamic and motivated, enough to say that the average age it is of 22 years!

NSR makes highly performing model cars, a technological concentration of parts to be competitive straight out of the box.
